PROJECTS

1. Nexus- A Secure Voice Assistant (Code reach):

- Built a classification model using NLP, ZTA and Reinforcement Learning. A secure AI voice assistant robot with authentication for a single authorized user.
- NLP, Pyttsx3(text-to-speech), HTML & CSS (User Interface), JavaScript (Face Recognition & Home page)
- It is based on Request-Response model
- Speech recognition (voice to text input)

2 . RAG-Based Research Assistant (Code reach) :

- Developed a **RAG-based research assistant** integrating, **LLMs with vector databases** for accurate, context-aware information

SKILLS

Skills are mentioned based on my prior Knowledge:

- Python
- Django
- MySQL
- NumPy, Pandas, Matplotlib, Scikit-learn
- Data Pre-processing

EXPERIENCE

➢ Python Development
Code reach Software and Education Private Limited.
Dec 2021 – Till Date
- Processed and cleaned datasets using pandas, NumPy, and SQL.
- Designed and implemented **end-to-end pipelines**, including data preprocessing, feature engineering, model training, and deployment, improving predictive accuracy by **20%**, also done automation of excel, csv and Json files and have good knowledge about visualizations tools.

CERTIFICATES

- **Python For Data Science** –NPTEL
- **Internship in Full Stack Development using Python** Sumago Infotech
- **JCON**-Conference Certificate

ACHIEVEMENTS

❖ Published a research paper on **Nexus** – A Secure Voice Assistant Robot in **International Journal of Creative Research Thoughts** [IJCRT].

❖ Superstar of The Training Award by Sumago Infotech Pvt. Ltd.
